Clare Morris

Head of Department of Clinical Education and Leadership, University of Bedfordshire, UK.
Doctor in Education (EdD) in Medical Education - Institute of Education, University of London.

Clare Morris has been actively involved in clinical education and educational development for the past 20 years. Before that, she worked as a clinical academic (in Speech and Language Therapy) at City University. She has worked with under-graduates and post-graduates taking first steps into their chosen professions, and also with the highly experienced medical, dental and healthcare educators who support their learning and development. Her new department (Clinical Education and Leadership) draws together all post-qualifying provision for healthcare professionals, with opportunities for discipline specific, inter-disciplinary and inter-professional work. Clare has researched and published in areas like approaches to faculty development, clinical teachers experiences of 'educational development' activity, and the role of teaching research in higher education institutions.

Tim Swanwick

Dean of Postgraduate Medical Education, Health Education North Central and East London

Tim has a broad range of experience in medical education and is currently Dean of Postgraduate Medical Education for Health Education North Central and East London where he is responsible for around 4500 doctors in postgraduate training programmes, as well as contributing to strategic multiprofessional workforce development more generally. Tim has a wide variety of academic interests including work-based learning, faculty development, professional support, academic training and clinical leadership. In addition to his role of postgraduate dean, Tim is also a Visiting Professor of Medical Education and Leadership at the University of Bedfordshire and an Honorary Senior Lecturer at Imperial College and Queen Mary University of London. A general practitioner by clinical background, Tim has researched and published widely in both his specialty and medical education. Recent publications include the books Understanding Medical Education (2013 and 2010), Clinical Teaching Made Easy (2010) and the ABC of Clinical Leadership (2010).
