

List of publications per nov 2011.1978-1982

1. Wieloch T. and K-E. Falk. (1978) A NMR study of a tyrosine and two histidine residues in the structure of porcine pancreatic colipase. FEBS Lett 85:271-274.
2. Wieloch T., B. Borgström, K-E. Falk and S. Forsén. (1979) High-resolution proton magnetic resonance study of porcine colipase and its interactions with taurodeoxycholate. Biochemistry 18: 1622-1628.
3. Borgström B., T.Wieloch, and C. Erlansson-Albertsson. (1979) Evidence for a pancreatic procolipase and its activation by trypsin. FEBS Lett 108:407-410.
4. Lindman B., N. Kamenka, H. Habre, J. Ulmius and T. Wieloch. (1979) Aggregation, aggregate composition and dynamics in aqueous sodium cholate solutions. J Colloid Interface Sci 73:556-565.
5. T. Wieloch, B. Borgström, G. Pieroni, F. Pattus and R. Verger. (1981) Porcine pancreatic procolipase and its trypsin activated form. Lipid binding and lipase activation on monomolecular films. FEBS Lett 128:217-220.
6. T. Andersson, T.Drakenberg, S.Forsén, T. Wieloch and M. Lindström. (1981) Calcium binding to porcine pancreatic phospholipase A₂ studied by ⁴³Ca NMR. FEBS Lett 123:115-117.
7. T. Wieloch, B. Borgström, G. Pireoni, F. Pattus and R. Verger. (1982) Product activation of pancreatic lipase. Lipolytic enzymes as probes for lipid/water interfaces. J Biol Chem 257:11523-11528.

1983-1990

8. K. Hougaard, B. Nilsson and T. Wieloch. (1983) Fatty acid cyclo-oxygenase inhibitors and the regulation of cerebral blood flow. Acta Physiol Scand 117:585-587.
9. T. Drakenberg, T. Andersson, S. Forsén and T. Wieloch. (1984) Calcium ion binding to pancreatic phospholipase A₂ and its zymogen. Biochemistry 23:2387-2392.
10. T. Wieloch, R.J. Harris, L. Symon, and B.K.Siesjö. (1984) Influence of severe hypoglycemia on brain extracellular calcium and potassium activities, energy, and phospholipid metabolism. J Neurochem 43:160-168.
11. R.J. Harris, T. Wieloch, L.Symon and B.K.Siesjö. (1984) Cerebral extracellular calcium activity in severe hypoglycemia: Relation to extracellular potassium and energy state. J Cereb Blood Flow and Metabol 4:187-193.
12. P. Blomqvist, O. Lindvall, and T. Wieloch. (1984) Delayed postischemic hypoperfusion: Evidence against involvement of the noradrenergic locus coeruleus system. J Cereb Blood Flow Metabol 4:425-429.

13. R. Auer, T. Wieloch, Y. Olsson and B.K. Siesjö. (1984) The distribution of hypoglycemic brain damage. *Acta Neuropath (Berl.)* 64:177-191.
14. K. Hougaard, M. Ingvar, T. Wieloch and B.K. Siesjö. (1984) Cerebral metabolic and circulatory effects of 1,1,1-trichloroethane, a neurotoxic industrial solvent. 1. Effects on local glucose consumption and blood flow during acute exposure. *Neurochem Path* 2:39-53.
15. M-L. Smith, G. Bendek, N. Dahlgren, I. Rosén, T. Wieloch and B. Siesjö.(1984) Models for studying long-term recovery following forebrain ischemia in the rat. 2. A two vessel occlusion model. *Acta Neurol Scand* 69:385-401.
16. B.K. Siesjö, G. Bendek, T. Koide, E. Westerberg and T. Wieloch. (1985) Influence of lactic acidosis on lipid peroxidation in brain tissues in vitro. *J Cereb Blood Flow Metabol* 5:253-258.
17. P. Blomqvist, O. Lindvall, U. Stenevi and T. Wieloch. (1985) Cyclic AMP concentrations in rat neocortex and hippocampus during and following incomplete ischemia: Influence of central noradrenergic neurons, prostaglandins and adenosine. *J Neurochem* 44:1345-1353.
18. T. Wieloch, O. Lindvall, P. Blomqvist and R. Gage. (1985) Evidence for amelioration of ischemic brain damage by lesions to the perforant path. *Neurol Res* 7:24-26.
19. J. Desphande and T. Wieloch. (1985) Amelioration of ischaemic brain damage by postischaemic treatment with flunarizine. *Neurol Res* 7:27-29.
20. P. Blomqvist and T. Wieloch. (1985) Ischemic brain damage in rats following cardiac arrest using a long-term recovery model. *J Cereb Blood Flow Metabol* 5:420-431.
21. T. Wieloch, B. Engelson, E. Westerberg and R. Auer. (1985) Lesions of the glutamatergic cortico-striatal projections ameliorate hypoglycemic brain damage in the striatum. *Neurosci Lett* 58:25-30.
22. T. Wieloch. Trypsin activation of pancreatic procolipase.(1985) Kinetics of activation and effect on lipid binding. *FEBS Lett* 185:63-66.
23. K. Fredriksson, I. Rosén, B. Johansson and T. Wieloch. (1985) The thromboxane synthetase inhibitor OKY-1581 prevents cerebral ischemia and neuronal transmission failure induced by sodium arachidonate platelet aggregation. *Stroke* 16:800-805.
24. P. Blomqvist, O. Lindvall and T. Wieloch. (1985) Lesion of the noradrenergic locus coeruleus system aggravate neuronal necrosis after transient cerebral ischemia. *Neurosci Lett* 58:353-358.
25. R. Auer, H. Kalimo, Y. Olsson and T. Wieloch. (1985) The dentate gyrus in hypoglycemia: Pathology implicating excitotoxin mediated neuronal necrosis. *Acta Neuropathol (Berl.)* 67:279-288.
26. T. Wieloch. (1985) Hypoglycemia-induced neuronal damage is prevented by a N-methyl-D-aspartate receptor antagonist. *Science* 230:681-683.
27. U. Tossman, T. Wieloch and U. Ungerstedt. (1985) GABA and taurine release in the striatum during hypoglycemic coma, studied by microdialysis. *Neurosci Lett* 62:231-235.

28. D. Warner, J. Deshpande and T. Wieloch. (1986) Isoflurane does not ameliorate post-ischemic neuronal necrosis during rat forebrain ischemia. *Anesthesiology* 63:19-23.
29. J. Deshpande and T. Wieloch. (1986) Postischemic treatment with flunarizine, a calcium entry blocker, ameliorates ischemic brain damage in the rat. *Anesthesiology* 64:215-224.
30. T. Koide, T. Wieloch and B.K. Siesjö (1986) Chronic dexamethasone pretreatment aggravates ischemic neuronal damage. *J Cerebr Blood Flow Metabol* 6:395-405.
31. T. Koide, T. Wieloch and B.K. Siesjö. (1986) Circulating catecholamines modulate ischemic brain damage. *J Cerebr Blood Flow Metabol* 6:559-565.
32. E. Westerberg, T. Wieloch (1986) Lesions of the corticostriatal pathways ameliorate the release of arachidonic acid in the rat striatum. *J Neurochem* 47:1507-1511.
33. B. Engelsen, E. Westerberg, F. Fonnum, T. Wieloch (1986) Effect of insulin induced hypoglycemia on the concentrations of glutamate and related amino acids and energy metabolites in the intact and decorticated striatum. *J Neurochem* 47:1634-1641.
