Gendered Innovations in Science, Biomedicine and Engineering

LONDA SCHIEBINGER FROM STANFORD UNIVERSITY | 24 NOVEMBER

WORKSHOP ON EXCELLENCE IN RESEARCH WITH SEX AND GENDER ANALYSIS
Can we harness the creative power of sex & gender analysis for discovery and innovation? Several case studies will be discussed, for example stem cells, animal research, possibly osteoporosis research in men, machine learning, robotics and seat belts for pregnant women.

WHAT IS GENDERED INNOVATIONS?
2. 26 case studies as concrete illustrations of how sex and gender analysis leads to excellence in research.
3. Developed through a collaboration of over 100 experts from across the United States, Europe, Canada and South Korea.
4. Funded by the National Science Foundation, the European Commission and Stanford University.

TIME AND PLACE
24 November at 2 pm, Fysicum, Sölvegatan 14, H221
Join for dinner afterwards if you please!
