Announcement Post doc scholarship

Faculty of Medicine
Department of Laboratory Medicine, Lund

Announcement: Post doc scholarship in Proteomics and Erythropoiesis

Scholarship

We are seeking a highly motivated and ambitious postdoctoral fellow to join a cross-disciplinary team at the Department of Laboratory Medicine at Lund University, Sweden. The project is a joint project between the research groups of Jenny Hansson (PhD), Kenichi Miharada (PhD), Martin L. Olsson (MD, PhD, Prof.) and Johan Flygare (MD, PhD).

The overall aim of the research project is to identify yet unknown key regulators of red blood cell production by dissecting the local environment in which early erythropoiesis occurs. The specific focus of the position described herein is to *use cutting-edge mass-spectrometry based proteomics approaches to identify the regulators active in the erythropoietic niches*. We are in parallel seeking two additional postdoctoral fellows that will be focusing on characterizing the niches in mouse and dissecting the mechanisms in humans, respectively. The three postdoctoral fellows will therefore each specialize within the respective mentioned focus area which is necessary to answer the big question of the large team.

The world-renowned blood and stem cell research environment at the Department of Laboratory Medicine includes the Lund Stem Cell Center with close interactions between around 150 researchers with a focus on stem cell biology of the blood and nervous system. The candidate will be an active part of a stimulating and highly interactive international research environment.

Qualifications required

Candidates are expected to have a strong background in mass spectrometry-based proteomics. Knowledge in hematopoiesis and erythropoiesis is an advantage.

Essential skills and requirements:

- Ability to independently prepare protein samples is required
- Hands-on experience with nano-LC and mass spectrometer is essential

- Familiarity with Thermo Fusion Tribrid and QExactive HF-X is an advantage
- Experience with data-independent acquisition is desirable
- Familiarity with the different software packages and mass spectrometry data analysis pipelines is required
- Programming skills are an advantage

Candidates must be highly motivated to pursue postdoctoral studies within an interactive research team. Abilities to work independently as well as part of a team are essential. Excellent verbal and written communication skills in English are required for consideration.

The applicant should not have been employed by Lund University within the last two years in order to be able to receive a scholarship. PhD degree should not be more than three years old at the last day of applying.

Placement: Division of Molecular Hematology

Ref No: V 2019/357

Duration: 2 years

Starting time: 2019-05-01 or as agreed

Last day for applying: 2019-04-08

Other

Lund University encourages both men and women to apply for the position.

Information regarding post doc scholarships at Lund University

- The scholarship amounts to 25000 SEK/month and is normally paid three months in advance.
- The scholarship is intended for the recipient's own education and does not constitute compensation for work carried out for the University.
- The scholarship is a grant and therefore not subjected to tax deduction.
- The scholarship does not entitle the recipient to compensation in case of illness.
- The scholarship does not constitute a pensionable income.
- The scholarship does not entitle the recipient to vacation.
- The scholarship does not include financial compensation for parental leave.

- The scholarship does not entitle the recipient to allowance during travels in the line of duty.
- The scholarship awarded is to be reviewed by the head of department every six months and the supervisor is to inform the head of department before each review of any significant circumstances.
- Scholarships set up by Lund University for any individual may not run for a period of more than 24 months.
- The scholarship follows the regulations established by the Vice-Chancellor of Lund University (June 27th 2013; Reg. No PE 2013/356).

Application

Application stating the reference number **V 2019/357** and containing a personal letter, CV including list of publications and names and contact information of at least two reference persons, as well as proof of dissertation should be sent to: Jenny.Hansson@med.lu.se.

Last day of application is 2019-04-08
