Announcement of a post-doctoral scholarship at the Medical Faculty, Lund University, Sweden

Studies on novel approaches of tumor target identification
The selected candidate will perform studies with the aim to identify targetable, cell-surface antigens expressed in primary brain tumors with a specific focus on high grade glioma. The challenging studies include a novel procedure for proteomics-based analyses of patient tumors as well as experimental models, combined with advanced imaging and bioinformatics.

Reference number: V 2019/958

Scholarship period: The scholarship covers a period of 24 months.

Preliminary start date: 2019-09-15

Principal investigator/contact person: Mattias Belting, Professor of Oncology.
E-mail: mattias.belting@med.lu.se

Qualifications:
- The candidate should have a strong track record from cancer research, and previous experience from cell and animal models
- The recipient must hold a PhD degree within a relevant field. The PhD degree should not be from LU. The PhD degree must not be older than three years. The applicant must not have been employed at LU in the past two years.

Written application, including reference number, is to be sent via e-mail to the principal investigator and must include the following:

- CV
- Personal letter stating the reasons why the study suits the applicant (maximum one page)
- List of publications
- References (2)
- Copy of PhD Diploma

Application deadline: 2019-08-05
