Announcement: Post doc scholarship in Neural Regulation of pancreas development

Scholarship
The principal aim of this scholarship is to study the role of neurotransmitter signaling pathways in pancreatic beta cell development. Towards achieving this goal the applicant will use animal models, human tissue and state of the art cell culture techniques to establish the role of neurotransmitter signaling in beta cell proliferation, migration and differentiation during pancreas development. Moreover the applicant will be trained to use metabolic techniques to determine the role of signaling pathways in adult human and mouse pancreatic islets.

Qualifications required
The candidate should have a solid understanding of molecular biology and histology, organ culture, and 3D imaging. A willingness to work with animal and human tissue, as well as handling of live experimental animals (mouse) is essential.

The applicant should not have been employed by Lund University within the last two years in order to be able to receive a scholarship. PhD degree should not be more than three years old at the last day of applying.

Placement: Stem Cell Center, BMC B10, Lund
Ref No: V2020/408
Duration: 2 years
Starting time: 2020-08-01
Last day for applying: 2020-06-07
