Announcement: Post-doctoral scholarship in functional studies of acute leukemia

Scholarship
Post-doctoral stipend with a focus on functional studies of acute leukemia

The Division of Clinical Genetics, Lund University, Lund, Sweden is looking for a highly talented post-doctoral fellow. The Division of Clinical Genetics is a world-leading research environment in cancer research consisting of eight principal investigators working mainly with leukemia and solid tumor research. Based on a series of recent research breakthroughs published in high-profile journals (e.g., Nature Genetics, Nature Communications, Leukemia) we are expanding our research efforts in translational leukemia research. The overarching purpose of this project is to unravel the pathogenetic mechanisms involved in hematopoietic cell transformation using a combination of genomic approaches and murine genetic models using state-of-the-art techniques for next-generation sequencing, bioinformatics, and functional studies in vitro and in vivo.

Qualifications required
We are looking for a skillful, ambitious and highly motivated postdoc to join our research group. Applicants are expected to have recent first author publications in internationally renowned peer-reviewed journals. Previous experience from research on cancer or hematopoietic malignancies is required. Further, previous experience of functional studies including animal work and in-vitro assays is a strong merit. Ability to work independently, as well as part of a team is essential. Applicants close to finishing up their PhD studies are also welcomed to apply.

The applicant should not have been employed by Lund University within the last two years in order to be able to receive a scholarship. PhD degree should not be more than three years old at the last day of applying,

Placement: Division of Clinical Genetics
Ref No: V2020/2081
Duration: 24 months
Starting time: April 1, 2021, or upon agreement
Last day for applying: February 8, 2021
