

## How to import a publication from PubMed to LUCRIS

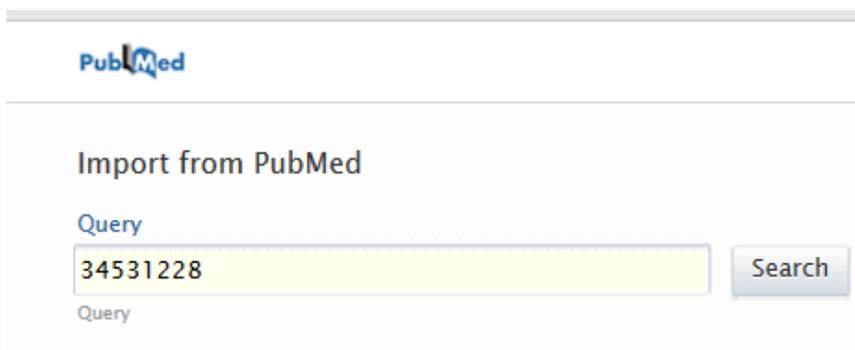

1. Enter LUCRIS (<https://lucris.lub.lu.se/>) and click the green Add content button on the right-hand side.

2. In the upcoming window, choose Research output – Import from online source – PubMed.

3. Look up the article's Pubmed ID (PMID) in PubMed and copy and paste it into the query field. This should be sufficient to retrieve the article. Click Search.

4. When the article comes up make sure it is the right one. Click Import.

1 result ▼

---

**Low lung function, sudden cardiac death and non-fatal coronary events in the general population**

Suneela Zaigham, Karl-Fredrik Eriksson, Per Wollmer, Gunnar Engström, 2021, vol. 8, issue 1, 2021. BMJ open respiratory research [DOI](#).

Article

 Import  Remove

---

5. The article is being imported and an author list is displayed. Make sure that you can find yourself among the authors and **that your name has been mapped to your LU profile**. If that is not the case, you can correct the author mapping via the arrow in the right column next to your name. **There has to be a black silhouette next to your name**, see screen dump below. If the silhouette is white the mapping has not worked and needs to be corrected. In the next step, click Import and review.

**Low lung function, sudden cardiac death and non-fatal coronary events in the general population**

Suneela Zaigham, Karl-Fredrik Eriksson, Per Wollmer, Gunnar Engström, 2021, vol. 8, issue 1, 2021. BMJ open respiratory research [DOI](#).

 Import and review

6. A window with the article metadata is opened. At the very top, you see the field Peer-reviewed/Not peer-reviewed, make sure that the right option is checked.

### Type

Peer-reviewed \*

Peer-reviewed  Not peer-reviewed

7. Find yourself in the author list and check if the correct affiliation for the article in question is shown. If you e.g. were affiliated with an institution outside LU, add that organisation by clicking on Edit next to your name and choose the right organization.

### Contributors and affiliations

Contributors \*

 **Suneela Zaigham, Author**

Internal person

Edit  

 **Cardiovascular Research – Epidemiology**

Organisational unit: Research group

–

 **Skåne University Hospital**

External organisation: Medical and health care

–

8. In the field “Publication managed by” your LU organization should be chosen. This is regardless which affiliation is mentioned in the article. This field is merely for administrative purposes and steers which persons can edit the LUCRIS record that you have created.

### Publication managed by

Managing organisational unit \*

 **Cardiovascular Research – Epidemiology**

Organisational unit: Research group

[Change organisational unit...](#)

9. At the bottom, choose the status “For validation” and click Save.

Status:

The article will then be picked up and validated by a librarian. This might take a few days. After that it will be visible in your publication list in the research portal.
