LIST OF PUBLICATIONS

1. Published/accepted papers (research communication published in English in international peer-reviewed journals) –
   Divided into three subsections: (1.1) Epidemiologic and statistical methods; (1.2) Epidemiologic/observational study reports; and (1.3) Clinical study reports

1.1 Epidemiologic and statistical methods

M10. Strömberg U. Should an expected number of cases be an integer? *Epidemiology* **5**:561-2, 1994. (Correspondence.)

M9. Strömberg U. Post-study probability of effect at least equal to a given value. *Epidemiology* **5**:477, 1994. (Correspondence.)

1.2 Epidemiologic/observational study reports

1.3 Clinical study reports

2. Invited Reviews and Chapters

Strömberg U. Semi-Bayes for balancing false-positive and false-negative findings in molecular epidemiology studies. In: Vineis P, Gallo V (eds.) ECNIS: Epidemiological concepts of validation of biomarkers for the identification/quantification of environmental carcinogenic exposures. [The EU Network of Excellence ECNIS (www.ECNIS.org); Deliverable D8.1: Evaluation of the contribution of biomarker technology to the identification/quantification of environmental carcinogetic exposures (peer-reviewed).]

3. Scientific papers published in national journals (in Swedish)

Feychting M, Ahlbom A, Björk J, Strömberg U. Bortfall i epidemiologiska fall-

4. Meeting reports

5. Other (theses)
